

ARPIT KADAM

AI/ML ENGINEERING STUDENT | DEVELOPER | TECH ENTHUSIAST

Vasai, Mumbai | 8767375722 | arpitkadam922@gmail.com | [ArpitKadam](#) | [Personal-Website](#) | [GitHub](#)

SUMMARY

AI/ML enthusiast with hands-on experience in developing impactful solutions using **Machine Learning, Deep Learning, and Computer Vision**. Skilled in turning raw data into real-world insights across domains like healthcare, finance, and robotics. Proficient in **Python, TensorFlow, MLflow, Docker, and OpenCV**, with strong expertise in data analysis and model deployment. Passionate about building ethical, scalable AI systems and thriving in cross-functional, collaborative environments.

TECHNICAL SKILLS

Machine Learning	TensorFlow & Keras	Data Analysis and Visualisation
MLOps	Artificial Intelligence (AI)	Python
Deep Learning	Computer Vision	Docker

PROFESSIONAL EXPERIENCE

Machine Learning Intern, NoviTech R&D Pvt. Ltd	Oct 2024 - Nov 2024
- Contributed to AI and machine learning research projects focused on automation, and predictive modelling. - Utilised TensorFlow and Keras for creating neural networks, advancing project objectives. Technologies: Python, Machine Learning, Deep Learning, TensorFlow, and Data Analysis.	
Machine Learning Intern, Acmergade	Jun 2024 - Aug 2024
- Built and maintained complete ML pipelines, including data acquisition, training, and validation. - Designed and implemented machine learning models to improve data processing and analysis, significantly increasing accuracy by 30%. Technologies: Python, Machine Learning, Pandas, Data Analysis, MLOps, and Flask.	

PROJECTS

<u>Zomato Delivery Time Prediction</u>
Built a complete ML pipeline with DVC, MLflow, and Docker to predict food delivery times based on geospatial and contextual features, deployed via Flask with batch prediction
<u>Chest Cancer Classification App</u>
Created a full-stack deep learning system using VGG19 and TensorFlow/Keras to classify chest X-rays, with a modular DVC pipeline, Docker deployment, and automated CI/CD via GitHub Actions.
<u>AI Price Predictor</u>
Developed a Flask-based web app for real-time cryptocurrency/stock price forecasting using TensorFlow/Keras, yfinance data, and Plotly, with seamless backend–frontend integration

EDUCATION

St. Peter's Junior College of Science & Commerce	Graduated in 2022
GPA: 58.67%	
St. Aloysius High School & Junior College	Graduated in 2020
GPA: 87.40%
