

Arpit Kadam

AI/ML Engineer | Generative AI & LLM Developer

Vasai, Mumbai | 8767375722 | arpstkadam922@gmail.com | LinkedIn | Personal Website | GitHub

Summary

AI/ML Engineer specializing in **Generative AI, LLMs, RAG systems**, and intelligent automation. Experienced in building production-ready **AI applications, transformer architectures, agentic workflows**, and scalable **ML pipelines** using Python, PyTorch, TensorFlow, FastAPI, Docker, and AWS. Strong understanding of **deep learning, NLP**, and **MLOps** with hands-on experience developing real-world AI solutions across document intelligence, healthcare, and predictive systems.

Technical Skills

Languages: Python, SQL

Generative AI & LLMs: LLMs, Generative AI, RAG, LangChain, LangGraph, AI Agents, Prompt Engineering, Vector Databases, LLMops

ML/DL: Machine Learning, Deep Learning, Transformers, Computer Vision, NLP

Frameworks: PyTorch, TensorFlow, Keras, Scikit-learn, OpenCV, FastAPI, Flask, Streamlit

MLOps & Tools: Docker, MLflow, DVC, GitHub Actions, AWS, CI/CD

Other: PostgreSQL, FAISS, ChromaDB, Pinecone, Hugging Face, Ollama, OpenAI APIs, Gemini APIs, Git, Linux, Data Analysis & Visualization

Professional Experience

Someware Intelligence Systems Pvt. Ltd.

Jul 2026 – Present

AI Engineer Intern

- Designed and built agentic AI workflows for intelligent task execution, using tool-calling and multi-step reasoning to automate internal processes.
- Performed large-scale data cleaning and preprocessing to prepare high-quality datasets for downstream LLM and agentic pipelines.
- Collaborated on prompt engineering and agent framework evaluation to improve reliability of production-ready AI features.
- **Technologies:** Claude Code, Google Agentic ADK, LangChain, LangGraph, Python, LLM APIs, Prompt Engineering

NoviTech R&D Pvt. Ltd.

Oct 2024 – Nov 2024

Machine Learning Intern

- Worked on AI and machine learning research projects focused on automation and predictive modeling.
- Built neural network models using TensorFlow and Keras for real-world datasets.
- Contributed to experimentation, training, and evaluation pipelines.
- **Technologies:** Python, Machine Learning, Deep Learning, TensorFlow, Data Analysis

Projects

Attention Is All You Code

- Built a transformer architecture from scratch in PyTorch to understand the internals of modern LLMs.
- Implemented multi-head self-attention, positional encoding, and transformer encoder-decoder blocks.
- Explored model scaling, forward-pass optimization, and GPU-efficient training strategies.

DocuXment App

- Developed a production-ready RAG-based document intelligence platform using NVIDIA LLMs and vector databases.
- Built support for multi-format document ingestion, semantic retrieval, query caching, and real-time question answering.
- Integrated interactive web interfaces and scalable API deployment workflows using FastAPI.

Chest Cancer Classification App

- Built a full-stack deep learning application for chest X-ray classification using VGG19 and TensorFlow/Keras.
- Implemented DVC pipelines, Dockerized deployment, CI/CD automation, and experiment tracking workflows.
- Developed a Flask-based web application with automated deployment using GitHub Actions.

Multi-Tool Agentic ChatBot

- Developed a modular multi-tool agentic AI chatbot for intelligent task execution and workflow orchestration.
- Designed extensible agent architectures with tool-calling, state management, and multi-step reasoning.
- Built scalable conversational AI pipelines supporting automation and complex agent-driven interactions.

Education

Shivajirao S. Jondhale College of Engineering, Mumbai University

B.E. in Artificial Intelligence & Machine Learning

2026
